Kaleidescape Speed Reader

KSPEEDREADER-2

- ▶ Imports 6 DVDs or 16 CDs per hour
- ▶ 280 disc capacity
- ▶ Stack loading
- ▶ Dual DVD/CD-ROM drives

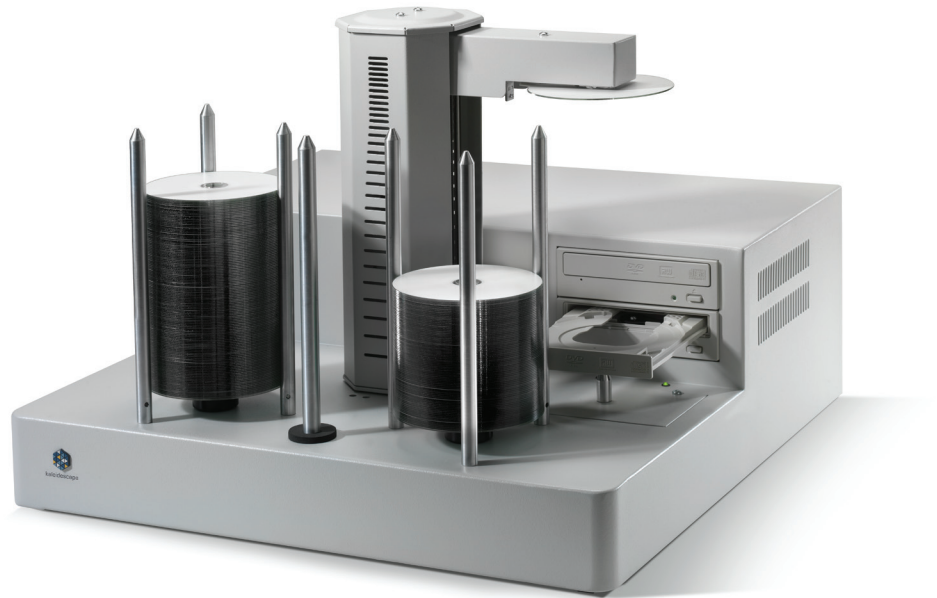

The Kaleidescape Speed Reader is a bulk loader for importing large numbers of DVDs and CDs into a Kaleidescape System.

Designed for reliable, unattended operation, the Speed Reader uses two DVD/CD-ROM drives to achieve an average import performance of six (6) DVDs or sixteen (16) CDs per hour. Each of two input bins accepts a stack of up to 140 discs for a total capacity of 280 discs.

Installation is simple and straightforward. The Speed Reader connects directly to Ethernet and is easily configured using the Kaleidescape browser interface.

Imports are managed on the browser interface. Long imports can be skipped, imports can be started and stopped, and the status of individual discs can be viewed. An import log tracks progress and reports problems, making it easy to locate scratched or dirty discs.
