The Kaleidescape System

The Kaleidescape System

Featuring an award-winning interface and providing instant access to your entire movie and music collection, the Kaleidescape System will change the way you enjoy movies. Forever.

With each and every component purpose-built to deliver an unparalleled home cinema experience, the Kaleidescape System is powerful and flexible enough to fulfill any design need.

Kaleidescape Players

M-Class Players

Provide the cutting edge video processing and bitstream multichannel audio output required by Blu-ray Discs and other high-definition content. The improved graphics facilities of M-Class architecture also enable high resolution cover art from the Kaleidescape Movie Guide, and a fully animated 1080p onscreen display.

M300 Player

Delivers incredible audio and video quality in a small package and supports 1080p video at 24 frames per second, as well as bitstream pass-through of Dolby® TrueHD and DTS-HD Master Audio™

M500 Player

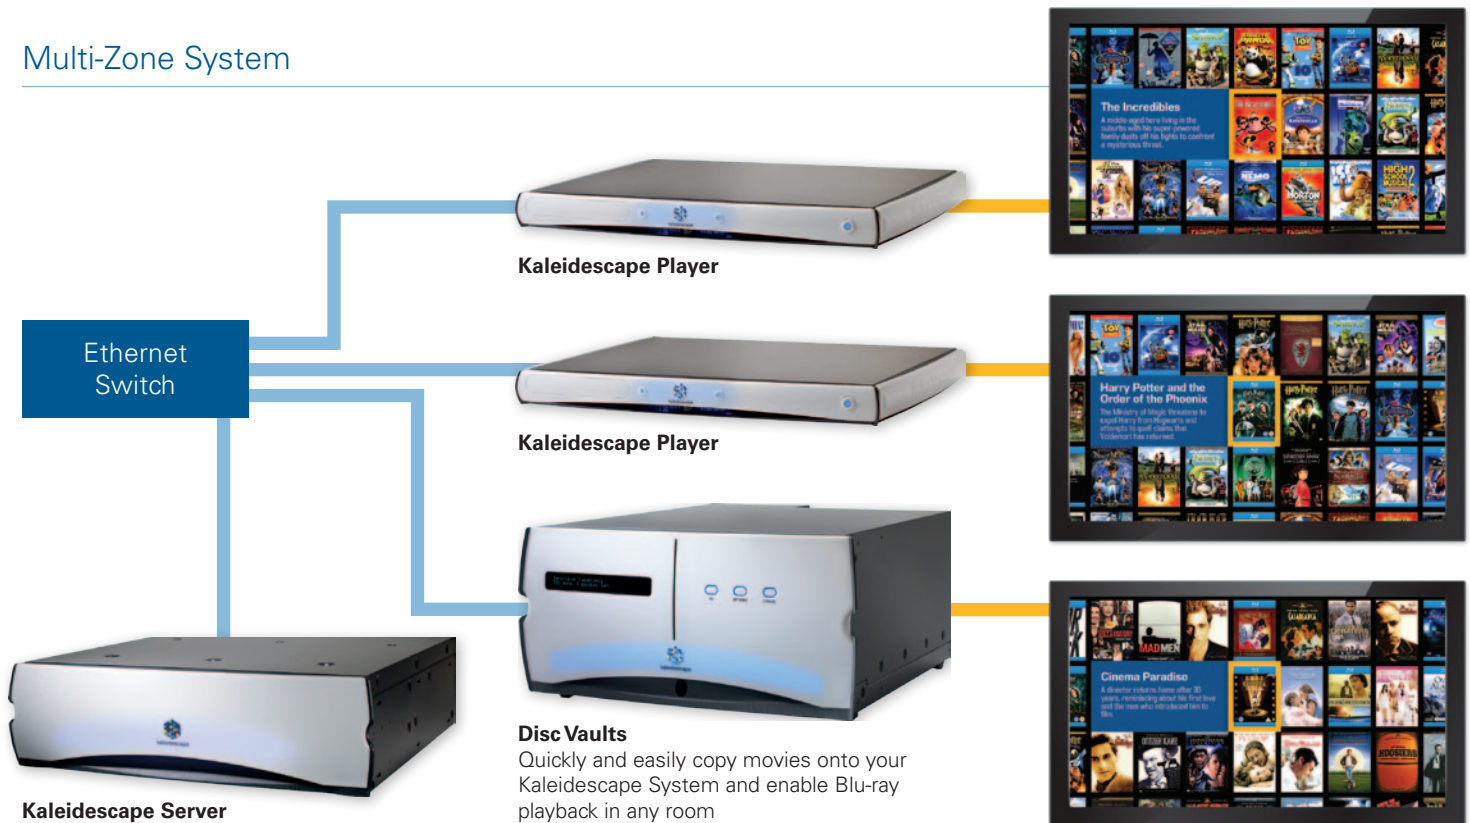

All of the powerful audio and video capabilities of the M300 Player plus an integrated disc reader for easily importing Blu-ray Discs, DVDs, and CDs

Music Player

Supports four independent zones of high-quality audio, with both digital and analog stereo outputs for each zone

Multi-Zone System

Kaleidescape Servers

1U Server

Elegant and robust and able to safely store copies of up to 150 Blu-ray Discs or 900 DVDs

3U Server

Designed to reliably store larger movie and music collections, and able to store copies of up to 600 Blu-ray Discs or 3,600 DVDs

Kaleidescape Disc Vault

M700 Disc Vault

The easiest way to copy, manage and store all your Blu-ray Discs, DVDs and CDs. Simply insert your discs and walk away. Discs are automatically copied to your server, and the presence of a Blu-ray Disc in the vault enables instant playback of the copy by any M-Class player in the system.
